Okusindja de Almeida

Frontend Developer | Web Developer | Mobile Developer
Luanda, Belas
okusindja@gmail.com
+244 956 035 826

I am an IT professional with a passion for Web Development and technology, backed by three years of experience. My ultimate goal is to achieve the highest level of proficiency in my career. Throughout my journey, I have successfully worked on over 30 e-commerce projects, catering to more than 1000 customers per shop daily, all while operating remotely.

My expertise lies in Web Development, where I have gained significant experience with the most widely-used frameworks and libraries worldwide. These include React JS, React Native, NextJS, and I possess a solid foundation in Angular Framework. Additionally, I have valuable experience working with GraphQL, which adds an extra dimension to my skill set.

As a Web Design and UI Developer, I leverage various technologies to create visually appealing and user-friendly interfaces. I am well-versed in CSS3, LESS, STYLUS, SCSS, Tailwind CSS, BOOTSTRAP, and Styled Components, among others. These tools enable me to deliver stunning and responsive designs that enhance the overall user experience.

When it comes to prototyping web projects, I utilize a range of applications such as Figma, Adobe XD, Proto.io, and many more. These tools allow me to efficiently create interactive prototypes, facilitating effective collaboration and seamless communication throughout the development process.

I am an enthusiastic professional seeking new opportunities to further enhance my skills and contribute to innovative projects. If given the chance, I am confident in my ability to deliver exceptional results. Let's connect, and I'll even treat you to some delicious donuts as a gesture of goodwill.

Work Experience

Front End Developer
Interest Protocol - Lisbon
April 2023 to Present

Experienced in developing robust interfaces with sleek animations, using top-rated frameworks and technologies. Recently, I collaborated with a leading fintech company specializing in cryptocurrencies. By leveraging TypeScript, Framer Motion, Next.js, Storybook, and StylinJS, I revitalized their interface, creating a visually stunning and seamless user experience. Used technologies and skills such as:
• Jest
• HTML
• Software Development
• User Interface Design
• Object-Oriented Programming (OOP)
• React.js

- Search Engine Optimization (SEO)
- Scrum
- Agile Methodologies
- TypeScript
- Front-End Development
- Next.js
- Git

Web Designer / Front End Developer
NSDev - Luanda
September 2021 to December 2022

Allowed to help and attend two companies at the same, FRN Cubo and NSDev, doing my best to work in their different schedules. First worked as a UI/UX Designer due to my ability to make designs. Designed websites, and in a short interval of time, I was proposed to occupy the Front End Developer role, where I helped on developing React templates, and made capable to make the deadlines even shorter with quality improvements. Used technologies such as:
- JavaScript;
- Type Script;
- HTML5;
- CSS3;
- Markdown;
- Bit Bucket;
- JIRA

Frontend Developer
FRN Cubo - São Paulo, SP
October 2021 to November 2022

Experienced in successfully delivering over 30 e-commerce projects with a substantial customer base of 1000+ users. Did code refactoring, Web app development, E-commerce development, and content management. working totally remote! Worked on big stores such as: Panasonic, Kipling, Caterpillar, Diesel, Sestini, São Geraldo, FRANKE, and many others of the best online stores in Brasil, mainly using as CMS the VTEX system, that growth as one of the best in Latin America due to it's big community! Used technologies such as:
- VTEX CMS/VTEX IO;
- CSS3/Sass/Less/Stylus/Bootstrap;
- JavaScript;
- TypeScript;
- Git;
- Git Workflow;

UI Designer
NSDev - Luanda
February 2021 to September 2021

Growth as a web and mobile designer, and linked in the development group on developing high quality interfaces, for every kind of businesses in Angola, Luanda. Designed web and mobile prototypes for big and small companies and for the NSDev as well. Used many technologies and design technics such as:
- Figma;
- Adobe Illustrator;

• Adobe XD;

Full Stack Developer
Freelancer
March 2020 to January 2021

Participated on building projects most of them are communitarian projects, to help people in the society with common problems, using the best of my skills. Teamed up with some of the best professionals in the Full Stack Developer role, served working in partnerships and by short time contracts. Gave life to projects like:
• CovidAngo: helped on building a team with different departments to develop an communitarian projects to track supplies and any kind of necessary stuff to fight against COVID-19. Solved programming bugs daily, and leaded the design role.
• Monocloud: Designed and developed the app for the ISPTEC developer team, the app consists on listing all the monographs in the Institute for students.
• Smart Hand-Hyg: Teamed up with a school colleague and bring to life a physical device to automatically sanitize people's critics body parts to prevent unnecessary contacts with the actual device. We used Arduino to develop the device's software, and many others projects!
